

GRAPHICAL USER INTERFACE FOR NAVIGATION, VIEWING AND MAINTENANCE OF RECIPES

ABSTRACT

- 5 A computer implemented enterprise resource planning system comprising a
recipe database contained within computer readable media and a graphical user
interface for navigation, viewing and maintenance of recipes is disclosed.
The database links all elements of a recipe. A recipe navigator view displays recipe
lists and other recipe information in a tree structure. A recipe summary view displays
10 information on a recipe element indicated in the recipe navigator tree view. A recipe
detail view is operable to edit components of a recipe element indicated in the
recipe navigator tree view. Namely, the recipe detail view allows the editing of
routings and formulas associated with a selected recipe.
